■ iOS Interview Assignment: Paginated Image Gallery

General Instructions:

1. Create a project named Hive.xcodeproj and send it via email to HR.
2. Time allotted is 45 mins.
3. You can use Google to check syntax, use of any AI tool is strictly prohibited.
4. Make sure that you follow expectations mentioned in the assignment PDF below.

Task: Build an iOS app that displays images from the Picsum API, with pagination and a detail view.

Requirements:

- Show a 3 × n grid.
- Custom cell should show image with user name.
- Use 'download_url' to load images on the cell.
- Tapping on an item will take user to the respective post link (use 'url' key for redirection).
- Add pagination.
- Add loader with API calls.

API Reference:

Endpoint: https://picsum.photos/v2/list?page=1&limit;=20

Sample Response:

```
{
  "id": "0",
  "author": "Alejandro Escamilla",
  "width": 5616,
  "height": 3744,
  "url": "https://unsplash.com/photos/yC-Yzbqy7PY",
  "download_url": "https://picsum.photos/id/0/5616/3744"
}
```

Extras:

- Show 5 × n grid for vertical iPhone and for iPads.
- Show detail screen on tap, which will show image preview with user details and URL link.
- Cache images.
- Pull to refresh.
- Animated transition while opening details page.

Expected:

- Responsive app scrolling.
- Lazy loading of images.
- Code Quality & Style.
- Good Architecture.
